Born to learn. Always adapting. Never static.

Key Skills

SQL | MSSQL | MySQL | DuckDB | Excel | SSIS | SSRS | ETL Design & Development | Data Analysis | BI | dbt
Python | Golang | Power BI | DAX | Flask | Web Services & REST APIs | PowerShell | AWS | Postman | Docker
GUI & TUI Development | Airflow | Linux | Shell | CI/CD | Jenkins | Terraform | Git | Jira | Agile | DevOps | Client-
facing Cross-team Collaboration | Project Leadership | Business Analysis | System-level Thinking |
Mentorship Knowledge Transfer | Trilingual (English, Hebrew, Dutch)

Professional Summary

Senior BI and Data Developer with 15+ years of experience designing and optimizing enterprise ETL/DWH solutions using SQL and SSIS. Experienced in BI reporting, data analysis, business requirements and technical solution design, with extensive experience collaborating with business users and enterprise customers. Strong background in Microsoft data technologies, Python-based data solutions and translating complex datasets into actionable business insights.

Professional Experience

FXCM - Tradu | Senior BI & Python Developer | 2020 – Present

- **ETL:** Developed and optimized custom Python ETL pipelines to ingest third-party API data, transforming and loading payloads into DuckDB.
- **BI & Data:** Engineered interactive BI dashboards and data visualizations using Streamlit and Jupyter, conducted deep-dive QA and Business Analysis using SQL and Python frameworks.
- **API Integration:** Designed and tested complex workflows involving multiple APIs via Postman, collaborating with third-party vendors to integrate external data solutions seamlessly.
- **GUI & TUI Development:** Architected and developed a custom in-house Python GUI for end-to-end testing and demonstrations ; built a parallel terminal-based (TUI) tool that streamlined daily data operations.

dbMotion – Allscripts (HealthTech) | Senior BI Developer | 2016 – 2019

- **Architecture:** Designed and developed complex SSIS/SQL solutions and large-scale, high-performance enterprise ETL pipelines.
- **Infrastructure Automation:** Maintained and optimized core product infrastructure components using PowerShell and .NET integrated within the SQL/SSIS ecosystem.
- **Technical Leadership:** Served as the primary technical lead steering communications between enterprise clients and cross-functional Professional Services (PS) teams.

- **Client Support:** Led technical investigations and debugging of mission-critical issues on client-side production servers, delivering rapid remote and on-site resolutions.

Opisoft - dbMotion (HealthTech) | BI Developer | 2011 – 2015

- **Project Leadership:** Acted as the Technological Lead for a high-priority, nation-wide Ministry of Health data project.
- **System Design:** Engineered an automated, high-reliability reporting system for public hospitals utilizing VB.NET and SSIS packages
- **Mentorship:** Served as the core SQL Instructor for Opisoft's internal corporate BI certification and onboarding courses.

Mobius Solutions | BI Analyst | 2009 – 2011

- **Data Analysis:** Conducted advanced corporate data analysis utilizing complex SQL querying and advanced Excel modeling techniques.
- **ETL Development:** Responsible for data mapping, technical specification writing, and creating comprehensive Source-to-Target (S2T) design documents and implementation with SSIS.

Jerusalem College of Technology | Head of E-learning / Lecturer | 2007 – 2009

- **Team Management:** Spearheaded the department's platform shift while managing a team of 4–6 professional staff members.

Education

- **DevOps Course** | DevOps Experts (2026)
 - Final project involving Python, Docker, K8s, Terraform, Jenkins and Git
- **MBA in Finance and Information Systems** | Hebrew University, Jerusalem (2009)
 - *Award for Top Final Paper* | Grade: 85
 - Member of the Business School Investment Fund Management Team
- **B.A. in Technology Management & Marketing** | Jerusalem College of Technology (2007)
 - **Valedictorian** | Grade: 90

Languages & Interests

- **Languages:** English (Native), Hebrew (Native), Dutch (Intermediate)
- **Hobbies & Projects:**
 - **Home Lab:** Raspberry Pi server with Docker – managing containers for Nginx, Pi-hole, Portainer, Jupyter, a DIY boiler monitor and some tools.
 - **Community:** Commander of the local volunteer Firefighter unit
 - **Interests:** Strategy board games
